DELPHINUM FORMOSUM.

The best hardy herbaceous plant in cultivation; there are many species and varieties of the genus, all beautiful, but much similar; this variety is believed to be the finest. The flowers, which are in spikes of the most delicate blue, marked by a white spot in the center of each floret; it is in continuous bloom from July to November, giving a supply of flowers of the most beautiful blue throughout the season.

☞ Large plants, 25 cents each; $2 per dozen.

DIELYTRA SPECTABILIS.

Having on hand a large stock of this new hardy herbaceous perennial, a native of China, which has already become one of the standing favorites of our gardens; it is a plant of neat dwarf habit, seldom growing over a foot in height; the foliage light and transparent; the flowers, which are produced on stems in sprays, are of a bright, rosy pink, about the size of a lozenge, and of a heart shape; the corolla is of a pearly white, set in frosted silver; the stalks are literally gemmed with these beautiful flowers, which are produced in large numbers, commencing in May, and continuing all summer. For garden vases, or rustic baskets or pot culture, nothing can excel it for gracefulness and beauty.
